

## From the Accelerating Universe to Accelerating Particles: Cosmic Philanthropy

**ROBERT P. KIRSHNER**  
Gordon and Betty Moore  
Foundation

### **Abstract:**

In this talk, I will show how the Gordon and Betty Moore Foundation, your philanthropic neighbor on Page Mill Road, helps fund basic science. With an annual science budget of \$100 Million per year, we are small compared to federal agencies, but we are free to select topics and methods to advance the fields in which we work. I will give some examples from time domain astronomy, particle accelerators and quantum materials of interest to SLAC staff.
